MANUFACTURING DAY @ PRECISION MOLDED PLASTICS (UPLAND) 10-5-18

In celebration of Manufacturing Day, PRECISION MOLDED PLASTICS will open its doors on FRIDAY, OCTOBER 5, 2018, to students from local schools and to other attendees as part of an effort to change people's perceptions about today's manufacturing environment and draw attention to the outstanding opportunities that a career in manufacturing can provide.

This tour will provide attendees with the opportunity to observe modern plastic injection molding machines, automated equipment, and factory personnel as they manufacture plastic parts and components for a variety of applications and industries. Explanations of scientific molding techniques, quality control, quality assurance, mold building and maintenance, and more will be included, as will a question-and-answer period at the end.

Manufacturing Day is an annual national event executed at the local level supported by thousands of manufacturers as they host students, teachers, parents, job seekers, and other local community members at open houses, plant tours, and presentations designed to showcase modern manufacturing technology and careers.

Precision Molded Plastics has been a premier custom plastic injection molder for nearly 40 years, specializing in high volume, precision plastic parts using scientific molding techniques, modern manufacturing equipment, and an ISO 9001:2015 certified quality management system.

What: Manufacturing Day Event
